glocal ASSET MANAGEMENT

GLOCAL HIGH GRADE EUROBONDS FUND

Unless otherwise stated, all the data as at: **30-Sep-25**

3.6% 1 YEAR TTM RETURN

5.0% ANNUALIZED RETURN SINCE INCEPTION

FUND STRATEGY

This strategy targets short-duration, investment-grade sovereign and quasi-sovereign bonds from both developed and emerging markets. Its primary objective is to outperform U.S. dollar bank deposit rates by actively managing exposure across global fixed income markets.

WHY INVEST WITH GLOCAL?

- Pioneering in Armenian investment fund industry since 2017
- Diversification and balancing of security weights
- Leveraging and refinancing through repo
- Tax rate for the fund is 0.01% of NAV
- **No entry or exit taxes** for foreign investors.

Disclaimer

The data, views and forecasts in this document is for information purposes only and shall not be regarded as an offer, solicitation or recommendation for an investment. Past performance is no guarantee of future results. All investments involve risks including the risk of possible loss of principal. The market value of a Fund's portfolio may decline as a result of a number of factors, including adverse economic and market conditions, prospects of securities in the portfolio, changing interest rates, and real or perceived adverse competitive industry conditions. The Fund invests in securities and other investments that may be illiquid, which hold the risk that the securities will not be able to be sold at the time desired by the Fund. The Armenian securities markets have substantially less trading volume than the securities markets of OECD countries. Additionally, the capitalization of the Armenian securities markets is highly concentrated. This combination of lower volume and greater concentration in the Armenian securities markets may create a risk of greater price volatility than in the securities markets of developed economies. The views and forecasts contained herein are those of the GLOCAL team based on information that they believe to be reliable. These opinions may change over time.

MACROECONOMIC UPDATE

In September 2025, global bond markets showed mixed performance. About 60% of USD-denominated bonds gained, with investment-grade (IG) bonds outperforming high-yield (HY) ones. The U.S. Treasury yield curve flattened: 2-year yields stayed at 3.60%, 10-year yields fell 7 bps to 4.16%, and 30-year yields dropped 19 bps to 4.73%, reflecting expectations of a potential Federal Reserve rate cut.

U.S. economic indicators pointed to a slowdown. ADP private payrolls showed a decline of 32,000 jobs, while initial jobless claims were 225,000, indicating softening labor market conditions. September's official employment report was delayed due to the government shutdown. The ISM Services PMI edged up to 52.0%, signaling modest services sector expansion. In response, the Federal Reserve cut the federal funds rate by 25 bps to support growth amid inflation risks.

Globally, the IMF maintained its 2025 growth forecast at 3.0%, led by emerging markets. In Europe, the ECB kept rates at 2.0%, confident in eurozone resilience, though inflation remained a concern. In the eurozone, the HCOB Services PMI rose to 51.3, showing modest acceleration in services growth, with southern economies outperforming northern ones amid weak external demand.

In China, manufacturing contracted for the sixth consecutive month due to weak domestic demand and U.S. tariffs. India remained resilient, maintaining its 8% GDP growth target, though U.S. tariff increases on imports to 50% posed a headwind.
