

OVERVIEW

In April 2019, Glocal Profix USD fund reported a positive return of 0.83%. Armstat published the macro indicators for March 2019, according to which GDP expanded by 6.5% from the beginning of the year; CPI went up by 1.5%.

The growth was led by Services, Construction, and Wholesale trade – 17.3%, 10.8%, and 10.1% in March, respectively. Electricity production contracted by 14% during the month, with still a 3.4% y-o-y growth from the beginning of the year. Agricultural output remained on the same level. Exports declined for the third month in a row, rounding to USD 206.5mln; imports followed suit with a decrease of 3.1% – USD 1085.8mln for the three months up to March 2019; Trade deficit widened to USD 542.8mln – USD 13mln more compared to the same period a year ago. At 5.75%, the Central Bank’s refinancing rate remained unchanged; yields on 10-year AMD-denominated Government bonds stood at 9.9%, on par with that of previous month. Armenian dram appreciated against both USD and EUR, standing at 480.48 and 538.67, respectively.

The Fund's return since inception stood at 21.1%, rounding to 12.29% if annualized.

DISCLAIMER

The data, views and forecasts in this document is for information purposes only and shall not be regarded as an offer, solicitation or recommendation for an investment. PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS. All investments involve risks including the risk of possible loss of principal. The market value of a Fund's portfolio may decline as a result of a number of factors, including adverse economic and market conditions, prospects of securities in the portfolio, changing interest rates, and real or perceived adverse competitive industry conditions. The Fund invests in securities and other investments that may be illiquid, which hold the risk that the securities will not be able to be sold at the time desired by the Fund. The Armenian securities markets have substantially less trading volume than the securities markets of OECD countries. Additionally, the capitalization of the Armenian securities markets is highly concentrated. This combination of lower volume and greater concentration in the Armenian securities markets may create a risk of greater price volatility than in the securities markets of developed economies.

The views and forecasts contained herein are those of the GLOCAL team based on information that they believe to be reliable. These opinions may change over time.
